Regarding Global and Metric Editions

Cengage has a robust Global and Metric Editions program consisting of titles that have been versioned for international markets with content including updated metric units, updated cases and image banks, global referencing and Australian and Asian and global authors. Global and Metric editions are priced more affordably.

Cengage Australia is now making US versions of textbooks unavailable for sale where there is an equivalent Global or Metric Edition. The US versions are less suitable for Australian students due to imperial units of measurement and less relevant content. By making the US editions unavailable for sale, we are reducing market confusion and stock holding issues.

The full list of affected titles is attached.
