CORPORATE FINANCE: THE ESSENTIALS: ASIA-PACIFIC EDITION, 1E

Besley | Brigham | Henry | Watanabe 
 ISBN: 9780170210362
 360 pp | Paperback | eBook ©2013

Taking an applied approach, this book helps students relate to the theory by identifying decisions that companies and investors have to make, and building the knowledge required to evaluate these decisions and the relevant tools to make them.

All of the key equations are highlighted throughout the chapters and are summarised on tear-out equation cards, supporting learning for students who find it difficult to learn equations and mathematical principles.

- Engaging and relevant local and regional company examples include AWB, James Hardie, Telstra, Fosters Group, Rio Tinto, Fortescue Metals Group, and Woolworths Limited
- Chapter on Derivatives (Ch 9), written specifically for the Asia-Pacific region

TABLE OF CONTENTS

- Part 1: Introduction to managerial finance
1. An overview of managerial finance
 2. The financial environment: markets, institutions, and investment banking
- Part 2: Essential concepts in managerial finance
3. Analysis of financial statements

- Part 7: Working capital management
16. Working capital policy
 17. Managing short-term assets
 18. Managing short-term liabilities (financing)
- Chapter review cards
 Equation review cards

INVESTMENT ANALYSIS & PORTFOLIO MANAGEMENT, 1E

Reilly | Brown | Gunasingham | Lamba | Elston
 ISBN: 9780170416030
 1072 pp | Paperback | eBook ©2020

NEW

This first Asia-Pacific edition of Reilly/Brown's *Investment Analysis and Portfolio Management* builds on the authors' strong reputations for combining solid theory with practical application and has been developed especially for courses across the Australia, New Zealand, and Asia-Pacific regions. The real-world illustrations and hands-on activities enhance an already rigorous, empirical approach to topics such as investment instruments, capital markets, behavioural finance, hedge funds, and international investment. The text also emphasises how investment practice and theory are influenced by globalisation.

TABLE OF CONTENTS

Part I: The investment background

1. The investment setting
2. The asset allocation decision
3. Selecting investments in a global market
4. Organisation and functioning of securities markets
5. Security-market indexes

Part II: Developments in investment theory

6. Efficient capital markets
7. An introduction to portfolio management
8. An introduction to asset pricing models
9. Multifactor models of risk and return

Part III: Valuation principles and practices

10. Analysis of financial statements
11. An introduction to security valuation

Part IV: Analysis and management of common stocks

12. Macroanalysis and microvaluation of the share market
13. Industry analysis
14. Company analysis and stock valuation
15. Technical analysis
16. Equity portfolio management strategies

Part V: Analysis and management of bonds

17. Bond fundamentals
18. The analysis and valuation of bonds
19. Bond portfolio management strategies

Part VI: Derivative security analysis

20. An introduction to derivative markets and securities
21. Forward and futures contracts
22. Option contracts
23. Swap contracts, convertible securities, and other embedded derivatives

Part VII: Specification and evaluation of asset management

24. Professional money management, alternative assets, and industry ethics
25. Evaluation of portfolio performance

- Presents an in-depth discussion of investments and portfolio management, addressing both undergraduate and post-graduate courses looking for this approach
- Questions and problems at the end of each chapter give students the chance to practise computations for the more sophisticated investment problems covered in each chapter
- Almost every chapter discusses how investment theory or practice is influenced by the globalisation of investments and capital markets, ensuring students are prepared to function in a global environment
- Concept check questions at the end of major sections of the text ensure students stop, question and confirm their understanding before moving on

CONCEPT CHECK

You decide to invest your inheritance of \$10 000 in a portfolio of shares for 10 years. Over that timeframe, the value of the portfolio grows to \$21 000.
 Calculate the following metrics to evaluate the performance of your investment:

1. Holding period return
2. Annual holding period return
3. Holding period yield
4. Annual holding period yield
5. Compound annual growth rate

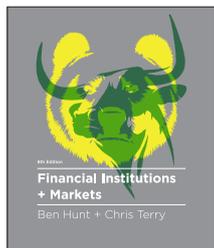

The 10-year Treasury Bond rate is 5 per cent. Would you have been wiser to invest in that instead?

The discussion of the theory and practice of using multifactor models of risk and expected return has been **updated and expanded**. The connection between the Arbitrage Pricing Theory (APT) and empirical implementations of the APT continues to be stressed.

Contains an **enhanced discussion** of the relative merits of passive versus active management techniques for equity portfolio management focusing on the important role of tracking error. **Expanded material** on measuring the tax efficiency of an equity portfolio has been introduced, along with **additional analysis** of equity portfolio investment strategies, including fundamental and technical approaches, as well as a detailed description of equity style analysis.

Includes a **revised discussion** of several advanced derivative applications (e.g. swap contracting, convertible securities, structured notes, real options), as well as **updated examples** and applications of each of these applications. An extensive discussion of how credit default derivatives are used in practice has also been updated.

FINANCIAL INSTITUTIONS AND MARKETS

FINANCIAL INSTITUTIONS AND MARKETS, 8E

Hunt | Terry

ISBN: 9780170411851

568 pp | Paperback | eBook ©2019

Thoroughly updated, this eighth edition provides a comprehensive and integrated account of the activities of Australia's financial institutions and markets – and their instruments – including the major capital and foreign exchange markets, and the markets for derivatives.

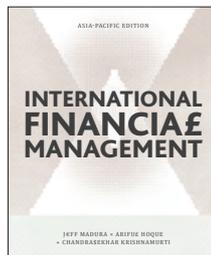

- All chapters and case studies have been updated to incorporate important recent developments, such as Brexit, and revised frameworks
- Presentation of the mathematical material throughout has been reorganised in a specially designed framework to more clearly display the calculations
- Online teaching and learning resources: exclusive-to-*MindTap* FinMaths interactives and exercises

Available with MINDTAP
