Available with *WebAssign*

James Stewart's Calculus series is the top seller in the world because of its problem-solving focus, mathematical precision and accuracy, and outstanding examples and problem sets. Selected and mentored by Stewart, Daniel Clegg and Saleem Watson continue his legacy of providing students with the strongest foundation for a STEM future. Their careful refinements retain Stewart's clarity of exposition and make the 9th edition even more usable as a teaching tool for instructors and as a learning tool for students.

Stewart was an outstanding teacher and digital innovator. His content used in conjunction with the *WebAssign* eLearning platform and its new resources like 'Explore It' interactive learning modules, allow you to tailor your course with a wide range of assignment settings, add your own questions and content and access student and course analytics and communication tools.

Showing that calculus is both practical and beautiful, the Stewart approach and *WebAssign* resources enhance understanding and build confidence for millions of students worldwide.

NEW! EXPLANATIONS AND EXAMPLES: Careful refinements throughout provide even greater clarity on key concepts such as computing volumes of revolution and setting up triple integrals.

NEW! WARM-UP EXERCISES: At the beginning of problem sets, new basic exercises reinforce key skills and build student confidence to prepare them for more rigorous exercises and conceptual understanding.

NEW! SUBHEADINGS: Additional subsections within chapters help instructors and students find key content more easily to make the text an even more helpful teaching and learning tool.

NEW! WEBASSIGN RESOURCES: New digital resources in *WebAssign* include 'Explore It' interactive learning modules, the *MindTap* reader for interactive and mobile eBook access, enhanced remediation support, and improved problem types.

PROBLEM-SOLVING EMPHASIS: George Polya's problem-solving methodology is introduced at the beginning and reinforced throughout.

QUALITY EXERCISES: With more than 8000 exercises in all, each exercise set carefully progresses from skill-development problems to more challenging problems. The exercises develop conceptual understanding, including Concept Checks that request descriptions, conjectures and explanations, and Problems Plus that apply techniques from more than one chapter.

Table of Contents

1. Functions and limits
2. Derivatives
3. Applications of differentiation
4. Integrals
5. Applications of integration
6. Inverse functions: exponential, logarithmic, and inverse trigonometric functions
7. Techniques of integration
8. Further applications of integration
9. Differential equations
10. Parametric equations and polar coordinates
11. Sequences, series, and power series
12. Vectors and the geometry of space
13. Vector functions
14. Partial derivatives
15. Multiple integrals
16. Vector calculus
17. Appendixes

Enrich the teaching and learning experience

WebAssign is a flexible and fully customisable online instructional system for STEM disciplines that puts powerful tools in the hands of instructors. It enables you to create and deploy assignments, instantly assess individual student and whole class performance, and realise your teaching goals. *WebAssign's* numerous product features are designed to provide you and your students with flexible online tools for measured learning.

Features & benefits

- **Rely on unparalleled answer evaluation and grading**
WebAssign's patented grading engine grades like a real instructor. The software behind the grading system is structured to understand and interact with mathematical language instead of forcing answer statements to fit a specific and inflexible framework. With the *WebAssign* grading system, students receive immediate and accurate feedback and enables you to focus on teaching instead of grading.
- **Manage assignments**
Selecting content for your assignments is simple. With *WebAssign's* question browser you can choose questions from your adopted textbook and the free additional resources collection, as well as create or modify your own questions. Usage statistics for each question help you gauge the difficulty level and average time on task based on historical question use.
- **Assess performance with powerful analytics**
WebAssign gives you an analytical view of your students' performance on questions and topics throughout the course. Use Class Insights to tailor your classroom discussions to review topics your class may not understand, or identify specific students who may need extra help. This tool lets you configure all settings and is completely customisable to your cohort needs.
- **LMS integrations**
WebAssign integrates with your institution's Learning Management System (LMS) for ease of use and can eliminate manual entry of routine data by linking your institution's information systems to our software.

Status	Topic (By date)	Attempted Questions Correct (1st attempt)	Flagged Questions	Action
⚠️	1.1: Linear Equations and Rational Equations (3 questions on Col Alg HW 1: Linear and Rational Equations)	59%	1	DETAILS
❗	5.22: 2B Simplify a variable expression using the Properties of Multiplication (3 questions on Co-Req HW 1: Linear and Rational Equations)	52%	1	DETAILS
✅	5.21: 2A Simplify a variable expression using the Properties of Addition (3 questions on Co-Req HW 1: Linear and Rational Equations)	74%	0	DETAILS

Students can use My Class Insights to check their individual performance and get more practice on tough topics.

CENGAGE
WEBASSIGN

"[WebAssign has] really good feedback, giving a full explanation of how to solve the problem - extremely helpful for learning."
Student, Deakin University

We partner with you to ensure your success with digital

Change can be daunting - but you're not alone. The Digital Partnership Team is your #1 local resource for support and training in the functional use of Cengage eLearning platforms. Our aim is to smooth the process for you, and to help you make the most of the technology, for you and your students. We're with you throughout your digital journey.

Cengage digital content integrates seamlessly with Learning Management Systems.

NEW AUTHOR TEAM CONTINUES JAMES STEWART CALCULUS SERIES

Selected and mentored by James Stewart, Saleem Watson and Daniel Clegg will continue his bestselling Calculus series used by more than 8 million students over the past 15 years.

About the authors

Saleem Watson is a Professor of Mathematics at California State University, Long Beach, specialising in the field of Functional Analysis. He received his Bachelor of Science degree from Andrews University in Michigan and did graduate studies at Dalhousie University and McMaster University, where he received his PhD under Stewart's instruction. Watson co-authored the bestselling Precalculus: Mathematics for Calculus with Stewart and Redlin.

"Professor Stewart wanted students to read and understand his Calculus texts; he always kept students in mind when writing each sentence, example, or exercise. As his longtime co-authors, we can collectively say that Professor Stewart's gentle and patient guidance was the key factor in the development of our own approach to textbook authorship."

-Saleem Watson

Daniel Clegg is a Professor of Mathematics at Palomar College and former colleague of Stewart's. He received his B.A. in Mathematics from California State University, Fullerton and his M.A. in Mathematics from UCLA. He assisted Stewart with various aspects of his Calculus texts and co-authored Brief Applied Calculus with Stewart.

"I worked closely with Professor Stewart on many aspects of his Calculus texts for nearly two decades; he was a mentor and an inspiration for me in both writing and teaching Mathematics. A paragraph would be traded back and forth, revised and refined at each stage, until we felt it had been perfected, and the book emerged better for it. Writing with Jim was a truly gratifying experience."

-Daniel Clegg

Stewart Calculus titles will continue to provide students with the strongest foundation for a STEM future. Watson and Clegg noted, ". . . all our changes are aimed at making the text even more usable as a teaching tool for instructors and as a learning tool for students. At the same time, we are mindful that we should not abruptly change the successful style and character of the textbook."

Before his passing in 2014, James Stewart was asked what advice he'd give Watson and Clegg. Stewart replied, "I trust you guys to carry it on. And I can't think of anybody better to do that than you."
