

## Pioneering new ways to foster deep learning and boost student success.

The innovative digital portfolio platform enables students to curate and showcase curricular and extra-curricular knowledge, experience, and accomplishments. Designed to encourage continuous reflection and critical thinking, the final ePortfolio features authentic evidence and documents a lifetime of achievement.

Institutions can effectively evaluate student performance with at-a-glance dashboards, semantic analytics, and actionable data on learning outcomes.

- Improve course pass rates, program performance, and retention
- Increase student engagement, metacognition, and digital literacy
- Strengthen career readiness competencies and employability
- Enrich student evaluations, accreditation, and competency-based assessment

*Pathbrite has enabled us to extend the digital capacity of the students and engage them in future focused learning. The Pathbrite system is easy to use, easy to navigate, easy to view and easy to assess. It is a great way for our students to showcase their work and share that work with their teachers and potential employers. The team at Pathbrite have provided an immense amount of support and as a result we have something that is working for teachers and students alike.*

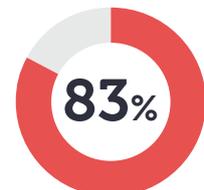

Emma Collins - Senior Lecturer, School of Nursing  
Ray O'Brien - Senior Online Learning Designer  
Otago Polytechnic, New Zealand

Portfolios can increase student retention rates by **50%**.

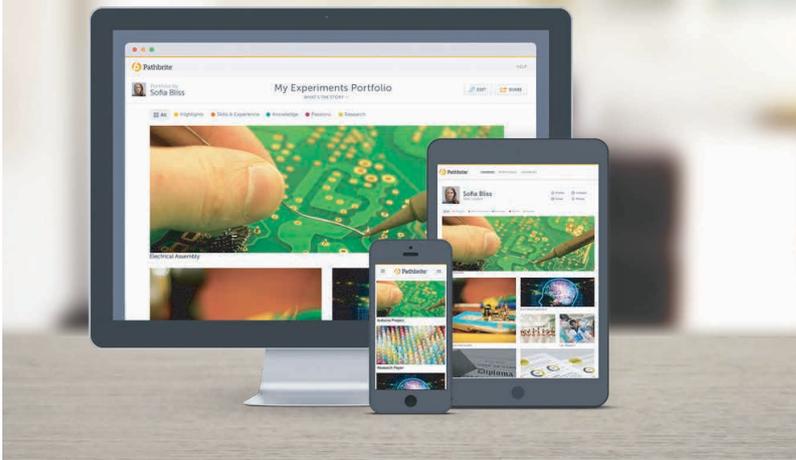

**93%** of employers agree that demonstrated skills are more important than a degree.

**4 in 5** hiring managers (**83%**) agree that ePortfolio would help in evaluating candidates.

Students are more than their test results.

## The Pathbrite Difference

Pathbrite has been innovating the way ePortfolios are approached as both a pedagogical and technological tool for the past three years. In this short time, we have already been built to scale throughout dozens of institutions as well as entire educational systems and offer a level of reporting and assessment on par with, or even better than other ePortfolio providers.

### ♥ The Pathbrite Experience:

Pathbrite provides an unparalleled teaching and learning experience. We design our software to deliver an engaging, enriching portfolio-building experience for every faculty member and student. Faculty will like Pathbrite because it's easy to learn and use. Students will enjoy the portfolio building process and will be able to see the value in not only getting to create and curate content, but also being able to take their work with them post-graduation.

### 📦 Unique and robust technical architecture:

Pathbrite's back-end structure is designed unlike any other educational technology. This powerful architecture encourages student ownership and portability, both vital components of portfolio learning pedagogy. It also gives us the ability to

generate reports and analytics which provide actionable data for educators to give their students the best chance for success.

### ↻ Interoperability:

Out of the box, Pathbrite offers an impressive suite of LMS and SIS integrations. The flexibility of our technology makes us the most open to integrations with other EdTech than any other ePortfolio platform. When it comes to integration questions, our answer has and always will be "Yes."

### 👤 Available for free for life:

Pathbrite is the only ePortfolio Platform that offers a free account to users for life, so that they can create an infinite number of portfolios and hold onto their full libraries of content.

Certainly others offer ePortfolio solutions or analytics and accreditation assistance, but lack where it matters most--the learning experience for students.

We know how critical it is for students to enjoy using the software if they're going to be successful. We also know that it's equally important for institutions to be able to access reports with the right information to impact student success.
